

From Lead. To Compliance. One Platform.

The single source of truth for Indian Chartered Accountancy firms. Replace eleven tools, a hundred spreadsheets, and the chaos that hides between them — with one calm, accountable, partner-ready system.

PARTNER-READY

Live revenue · workforce · risk visibility

Your firm runs on eleven different apps.

And none of them talk to each other. Every Monday morning starts with the same question: “What did we promise the client, and where did we save it?”

WhatsApp

Client docs, scope, payment proofs — buried under family forwards.

Excel sheets

Five different versions. The Senior Partner's laptop is the master copy.

Missed deadlines

GSTR-3B due tomorrow. Nobody pinged the client. Late fee: ₹50/day.

Document confusion

“Did we get the PAN copy?” — asked 14 times per filing season.

No employee visibility

You can't tell who's overloaded and who's idle until someone quits.

Lost referrals

A happy client wanted to refer two new ones. Nobody followed up.

Untracked emails

Compliance reminder went to spam. Client found out from the GST portal.

Partner blindness

You're a quarter into FY and still don't know which clients churned.

This isn't a small-firm problem. Firms doing ₹3Cr+ a year still operate this way — and lose 18-22% of their potential revenue to the friction.

What chaos actually costs

A conservative bottom-up estimate for a 15-employee firm with 200 clients. Numbers calibrated against published ICAI productivity studies and live customer data.

LEAKAGE VECTOR	VOLUME	ANNUAL COST	WHY IT HAPPENS
Missed compliance renewals	8 / yr	■2,40,000	Late fees, write-offs to retain client
Lost / churned clients	5 / yr	■8,75,000	Quiet attrition · avg ■1.75L LTV
Unrecovered receivables (90+ d)	12 / yr	■4,20,000	No follow-up cadence · written off
Lost referrals (untracked)	20 / yr	■6,00,000	Happy clients never asked
Employee idle time	2.4 hr/day	■9,36,000	Across 15 staff · ■260/hr fully-loaded
Partner time on coordination	60 hr/mo	■14,40,000	■2,000/hr partner billable rate

ESTIMATED ANNUAL LEAKAGE — 15-PERSON FIRM

■ 45.11 L

That's a senior associate's salary.
Every. Single. Year.

One platform. Ten modules. Zero gaps between them.

J-TACS isn't a CRM. It isn't a task tracker. It isn't accounting software. It is the operating layer underneath all of them — built from the ground up for the way Indian CA firms actually work.

- **Lead CRM**
9-stage pipeline. WhatsApp / referral / website sources tracked.
- **Client Onboarding**
Guided wizard, KYC capture, service mapping in 4 minutes.
- **Document Vault**
Versioned, expiry-aware, signed-URL secure. No more 'send PAN copy'.
- **Workforce Intelligence**
Live attendance, productivity score, workload alerts — partner-only.
- **Reports & Analytics**
Revenue, compliance score, employee scorecard — CSV/XLSX/PDF.
- **Quotations**
Branded PDF, e-acceptance, 3/7/14-day follow-ups — fully automated.
- **Task Management**
Kanban + assignee + due-date + comments + attachments per client.
- **Compliance Engine**
17 recurring templates, auto-generated tasks, deadline-aware notifications.
- **Payments & Invoicing**
Invoice → reminders → receipt → ageing report. No more chasing.
- **Automation Engine**
Daily cron reminders, recurring compliance, employee alerts — set once.

Nothing falls through the cracks. Ever.

Every interaction with every client is captured on a single timeline. From the first inbound enquiry to the third year of retention.

Auto-create client from WON lead

When a quotation is marked accepted, the system spins up the client record, preserves lead history on the timeline, and assigns the right employee.

Document expiry intelligence

Each document carries an expiry / renewal date. Thirty days before, the assigned associate is notified, the client is emailed — and the partner dashboard surfaces the risk.

Lifecycle event log

Nineteen typed event categories make it possible to audit any client's journey in 90 seconds. No more 'what happened with Acme last March?' on a Thursday call.

Finally — the firm at a glance.

The single login that tells a Senior Partner whether the firm is healthy. Built so you don't need to read it; one glance is the report.

3

High-risk clients
flagged

- **Revenue forecast** Invoiced · collected · outstanding · overdue. Live, by employee, by service line.
- **Upcoming deadlines** Next 7 days · 30 days. Surfaced by risk-weighted client value, not date.
- **Employee productivity** Per-head scorecard. Tasks completed, idle time, on-time ratio, ranked.
- **Compliance status** Firm-wide compliance score. Drill into any client, any filing type, in one click.
- **Approvals queue** Quotations awaiting partner sign-off. Single tap to approve and dispatch.
- **Risk alerts** Clients with ≥ 2 overdue tasks. Documents about to expire. Conversations gone cold.

Accountability, without micromanagement.

Built for partners who want to know — without becoming the bottleneck. Every login, every activity, every task transition is tracked passively in the background.

Live attendance grid

Online · Idle · Offline · On leave. Updated by a heartbeat every 5 minutes.

Productivity scorecard

Composite of completion rate, on-time ratio, and quality score. Ranked weekly.

Activity timeline

21 typed event categories — Login, Task Started, Document Uploaded, Filing Completed.

Attendance reports

Calendar view with CSV export. Built for compliance with labour records.

Workload distribution

Visual histogram of open tasks per employee. Overload flags trigger automatically.

Workforce alerts

Three idle days · zero outputs · or unusual drop — partner gets a private notification.

“The week after we launched workforce mode, I found 14 hours of weekly idle time I hadn't seen before. It paid for the software twice over in the first month.”

MANAGING PARTNER · 22-PERSON FIRM · MUMBAI

Every document. Knows when it expires.

Documents in J-TACS aren't files. They're typed objects with expiry, renewal, and completeness metadata — so the system can do the chasing instead of your associate.

Repository

Versioned, signed-URL secure, role-scoped access. Supabase-backed.

Expiry tracking

Each doc has expiry / renewal. 30-day alerts to client + associate.

Missing-document detection

Per service type, J-TACS knows what should exist. Lists what's missing.

Completeness score

Per-client metric. Surfaces on Partner dashboard. Drives renewal risk.

OUTCOME

Zero filings missed for a missing document.

Average customer outcome at month 3.

Set it once. It runs forever.

Three daily background jobs do the work of two full-time coordinators. Configurable per firm, per service, per client. Nothing locked in.

Compliance reminders

DAILY 08:00 IST

Filings due within 7 days → client email · employee notification.

Overdue task detection

DAILY 08:00 IST

Marks overdue, notifies assignee + managers, surfaces on dashboard.

Document expiry alerts

DAILY 08:00 IST

30-day lookahead, 7-day re-notify window, client + employee channels.

Recurring compliance

1ST OF MONTH 03:00 IST

17 service templates auto-generate tasks for the new month.

Quotation follow-ups

DAILY 09:00 IST

Day-3, day-7, day-14 nudges to unaccepted quotations. Branded firm sender.

Invoice ageing

DAILY 02:00 IST

30 / 60 / 90 day buckets recomputed; payment reminders dispatched.

Built like the bank your clients trust.

Most CA software is a thin UI over a shared database. J-TACS implements row-level security at the Postgres layer — meaning the database itself refuses to serve data the user shouldn't see. Even if the application code has a bug.

Role-based access (4 roles)

PARTNER · MANAGER · EMPLOYEE · CLIENT. Four levels, separately enforced at the route, server-action, and database tier.

Row-level security

62 active Postgres policies across 36 tables. EMPLOYEE sees only assigned clients, even via direct API access. Audited 2026-06-11 — 12 / 12 PASS.

Audit trail

Every login, every action, every approval — typed and timestamped. PARTNER-only viewer. Tamper-evident.

Approval workflows

Quotations · refunds · sensitive exports require MANAGER then PARTNER sign-off. Configurable per firm.

Encryption & backups

TLS in transit, AES-256 at rest. Supabase-managed daily backups, point-in-time recovery. DPDP-aligned data handling.

Rate limiting · CSRF · headers

Login / signup / reset throttled per-IP. CSP, XSS, frame-ancestors locked. DKIM-aligned firm-branded emails.

The economics, modelled.

Three firm profiles, conservative inputs, twelve-month view. All numbers are net of software cost and onboarding fees.

Methodology: hours saved priced at ■260/hr loaded cost · revenue protected = missed-renewal × avg-fee × 0.6 net · clients retained = baseline churn × 0.35 reduction.

Premium software.

Premium economics.

Every plan includes white-glove onboarding, training, data migration, and the full feature set.
No hidden modules. No paid add-ons. No per-API charges.

STARTER	POPULAR PROFESSIONAL	GROWTH	ENTERPRISE
Up to 5 users	Up to 20 users	Up to 50 users	Unlimited users
7,999 / month	14,999 / month	29,999 / month	Custom talk to sales
• All 10 modules included • 200 clients · 1,000 documents • Email & in-app support • 30-day onboarding • 1 PARTNER seat	• Everything in Starter • Unlimited clients & documents • Workforce intelligence • Priority phone support · SLA • Custom email branding · DKIM • Dedicated success manager	• Everything in Professional • Advanced reports + scheduled exports • API access & webhooks • Quarterly business reviews • Custom approval workflows • On-site training (one event/yr)	• Everything in Growth • Dedicated database tier • Custom SLA · 99.95 % uptime • Single Sign-On (SSO) • Compliance certifications • White-label client portal

Annual plans receive a 2-month discount. Multi-year terms negotiable. All prices exclusive of GST. Implementation is included in every tier.

Live in 28 days. Or your money back.

Every firm we've onboarded — partner-led — has been in production on or before day 28. A dedicated J-TACS success engineer runs the project end to end.

WEEK

01

DISCOVERY & SETUP

Kick-off call with partner team · firm profile created · users provisioned · branded email domain verified · audit baseline taken.

WEEK

02

DATA MIGRATION

Client list, employee roster, historical invoices and compliance schedule imported from Excel / Tally / WhatsApp. Validated end-to-end.

WEEK

03

TRAINING & UAT

Two live workshops — partner + manager (90 min) and employee (60 min). Each user runs a real filing in a sandbox tenant.

WEEK

04

GO-LIVE

Production cut-over · 5 business-day hyper-care · first-month review with success manager · QBR scheduled for day 90.

GO-LIVE GUARANTEE

If we miss the day-28 deadline for reasons within our control, the first month is free.

Today: the operating system. Tomorrow: the partner's co-pilot.

Every modern firm will eventually run on AI-assisted operations. J-TACS is the substrate that makes that future possible — typed events, structured clients, and a clean compliance graph.

AI Compliance Assistant

Natural-language queries against the firm's filing graph. "Which clients still owe GSTR-3B for August?" — answered in two seconds.

Predictive compliance

Forecast which deadlines a client will likely miss based on history, document velocity, and prior-year patterns. Surface 14 days early.

Client risk analysis

A score per client — payment health, compliance discipline, document completeness, engagement signal. Renewal forecasting that actually works.

Smart work allocation

Auto-balance task assignment based on real-time capacity, specialisation, and historical SLAs.

Firm intelligence

Benchmark anonymously against peer firms — revenue per partner, billable utilisation, compliance score percentile.

J-TACS

Stop managing chaos. Start running a firm.

The operating system for modern CA firms.
